

# 100 Creative Hashtags, 10 Creative Industries

## All About Hashtags

### What is a Hashtag?

In a nutshell, a hashtag is a word or phrase preceded by the pound sign. It serves as a mini-search engine within each social platform and groups topics together. When you create a hashtag, it creates a link to view all the shares that used the same hashtag.

#### People use hashtags to:

- Connect with others
- Share projects
- Reach brands
- Get inspired
- Help people
- Increase reach
- Categorize content
- Identify sponsored shares

The hashtags you use tell the platform who you are, what you are interested in, and what you do, and it will pair you with the people who are looking for that type of content. They are part of the secret sauce to get you noticed and are a tool to help your accounts grow.

### Want to know an incredible hashtag statistic?

**Having at least 1 hashtag can increase engagement on your share by 12.6%.**

Social Media shares with hashtags increase engagement and interaction with your shares simply because they are open for discovery by a wider audience. Using even one good hashtag increases your engagement easily.

While using industry hashtags builds your community, applying hashtags that your ideal customer is searching for is key. Think about your ideal client and put yourself in their shoes. What hashtag searches would they use to find you? If you are a locally-based business, also consider using location-based hashtags. Industry, Niche, and Location - these hashtag types are where you can start building your own personal hashtag library.

**100 Creative Hashtags, 10 Creative Industries** gives you usable hashtags to add to your shares. Use them to jumpstart a search for finding even more hashtags for your industry. We also encourage broadening and updating your hashtag library regularly. We hope these recommendations enhance your creative world!
